Title:

Comments: Please do not allow eMTB on non-motorized trails. They cause damage to the sensitive trails and the sheer power will cause conflict with other riders. Traditional mountain bike riders contribute physically and financially to maintaining healthy trail systems. Allowing eMTB on our trails disincentivize the support of the mainstream riders. The only reasonable compromise would be to re-classify eMTB as outlined by IMBA. I am confident that you are familiar with their recommendation.
