Comments: I am 78 years old and have ridden mtbs for over 40 years. I have raced in the past and was considered an Expert mountain biker. With age and health issues I need a class 1 mob just to keep riding with my younger friends. My e-mtb is no faster than my friends regular mtbs with a healthy rider. E-mtb only advantage is climbing hills which is where I need assistance. Without the E bike I would have to drop out of my biking club and probably give up mountain biking due to the hills. I have 4 artificial parts , Afib, and Asthma. I need a slight boost for climbing hills. the class 1 E-Bike I have is not a motorcycle or even close to being one.
