Comments: I object to allowing E-bikes to be treated as non-motorized for use on forest trails. I believe we should continue to exercise greater discipline for non-motorized trails as actually that in practice and for the future. Motorized uses can more readily add to human impacts and deprive our forests of their natural values. I believe the speed of E-bikes and that which will develop with the future of them is a problem for trail use, for all other users, and is not consistent with that use for the values of forests and forest visitation. I do not see this use of trails to be a value for why we protect the forests and for proper human use of non-motorized trails.
