Comments: It is clear to me that e-bikes are a motorized form of transportation. Calling it anything else is a misrepresentation of facts. E-bikes should be classified as motorized and should be able to access motorized trails without restriction, but allowing them on bicycle (human powered) trails creates a situation that is ripe for abuse, especially as e-bike and battery technology advances at such a staggering pace.

Please consider designating all e-bikes as motorized transportation. It is the most fair way of conveying to the public what a specific trail can be used for.
