Title:

Comments: I am a resident of Idaho that has grown up in North Idaho and currently resides in Southern Idaho. Across the state I have watched this amazing land being stained by projects such as this one. I have also seen the impacts on the rivers, lakes, and aquifers of these projects after they have taken what they wanted. The clean up is never as simple as proposed or executed nearly well enough as promised. The people proposing these projects do not care about this land because it is not theirs. This land is my land and the land of our future children and forests and salmon. I do not support this project.
