Comments: Electronic MTB's are NOT mountain bikes and should be banned from all park trails whether local, state or federal. The riders are mostly inexperienced and unprepared. I have witnessed many accidents caused by electronic mountain bikes. they are UNSAFE and a danger to hikers, equestrians, mountain bikers, and, most importantly, nature! On climbs and descents I have had electronic mountain bikers force me off the trail to avoid collisions - and I am a very seasoned and fit twenty year plus rider. These electronic mountain bikes should be on paved streets and paved trails only with other motorized vehicles. Please BAN all electronic mountain bikes and protect and preserve nature and those that embrace nature and the peace and tranquility of her beauty.
