Comments: Access to natural surface trails for all cyclists is critical to physical and mental health of individuals who enjoy riding bikes. As technologies evolve the need to examine access for Class 1 eMTBs and the unique characteristics they possess is important. Class 1 eMTBs should be classified as non-motorized while class 2 and 3 eMTBs should be classified as motorized. Therefore, I support trail access for Class 1 eMTBs and support shared use for Class 1 eMTBs on trails designated for non-motorized bikes.
