Title:

Comments: Ebikes on trails help more people have access and use of our nation's trails. Class 1-2 ebikes still require "pedal power" - requiring human power to move - not motorized, but assisted, just as a cassette assists a rider in going up and down hills and trails. Please support class 1-2 ebikes on our trails and give more access - and help as well improve the health and trails-access of our populations. Rich Howard
