Comments: E-bikes are MOTORIZED VEHICLES!!!! They do NOT belong on hiking trails!! I am an avid mountain biker, hiker and horseback rider. I use my own power on my mountain bike. E-bikes are a serious problem on my local trails. E-bikes go significantly faster than a self powered mountain bike and cause huge safety issues on the trails. They are essentially no different from motobikes, except that they run on a battery instead of gasoline. E-Bikes should only be allowed on motorized forest roads and motorized trails. E-Bikes must not be allowed on nonmotorized trails because they have a motor!
