Comments: Our forests have very little in the way of enforcement or punitive damages when guests leave trails or trespass outright. Allowing e-bikes would simply exacerbate a problem that has no remedy. I'm on my bike more days than not and I enjoy renting e-bikes on vacation. E-bikes in wild spaces are going to conflict with people trying to enjoy non-motorized activities. E-bikes are motorized vehicles, plain and simple. They should be treated as such and have no place in our national forests.
