Comments: I ride 2 self propelled mtn bikes and one e mtn bike. I understand the concerns for the safety of hikers and equestrians if e bikes are allowed to certain narrow trails. I think such access is to be encouraged provided it is a class one e bike, and the rider has a valid drivers license. If safety and consideration of others is important prohibiting male riders under 25 would further serve that purpose as many are inconsiderate and self absorbed, not all. Riders 60 years of age and above or handicapped should be allowed access on e mtn bikes if class one. I am an attorney, age 67 and an avid mtn biker. I propose that you classify class one e bikes as non motorized vehicles for purposes of trail access.
