Comments: I do not like the idea of motorized bikes on the mtb trails. There are enough rude and entitled users out there that don't know what trail etiquette is. Give those a motor and lookout. The current situation works well for the trails we have. Trail users and builders have it worked out. Add motors and things may change for the worse. However if there has to be, pedal assist class 1 and strict rules may work. Don't allow motorcycles of any type on the mtb trails!!
