First name: Margo

Last name: Vanderhill

Organization: ISEA

Title:

Comments: E bikes should not be allowed in our National Forests because their range and speed of travel will cause upheaval and stress on wildlife in the Forests. Our forest lands should not be exposed to the damage that these vehicles will cause to soil, foot trails, and water in the forests. These E bikes have high rates of speed which make their introduction into woodlands dangerous for riders and others around them.
