Comments: There have been many changes in the industry during my 44 years as a shop owner. and support the People for Bikes suggestions. I have an additional concern that Type 2 in particular will become very powerful and perform more like motorcycles. A few years ago the Pikes Peak motorcycle division was won by an E motorcycle that beat out a 200 + horsepower motorcycle. The potential is there to drastically change the dynamic and now we have the Motorcycle companies making E bicycles. I applaud your efforts to find some reasonable balance and compromise. It wont be easy.

Sincerely, John Crandall
