Comments: As an avid mountain biker, I don't wish to see pedal assist (class 1) e-bikes on non-motorized trails. However, proposed rules 7700 & 7710 will create problems for traditional bikers like me. If these 'motorized' bikes are allowed on non-motorized trails, the trails become motorized. This creates more problems than it solves. For now, keep all of the e-bikes off the non-motorized trails while the bikers, hikers and equestrians create a plan that works for everyone. It took a while for these groups to figure out how to coexist when mountain biking started, and we'll figure out a way to coexist with e-bikes. Rules 7700 & 7710 aren't the solution.
