Comments: Hi,

It is my understanding that allowing eMTB (electric mountain bikes) on non-motorized trails will cause funding which is normally available to go away because the trail would be categorized as a "Motorized" trail. I do not agree that eMTB's should be allowed on non-motorized trails if this will change the trails funding status.

If there is a way to allow eMTB's on trails and maintain the "non-motorized" trail status then I have not problem.
