Title:

Comments: eMTB bikes are exactly the same coming down trails as not pedal assist bikes. As far as climbing they are pedal assist only. There is not additional impact to trails and in fact for those of us that are older or have previous injuries, it just allows us to get out and enjoy the trails.

this is not something that states need to get involved with and they need to stay out of it and leave the citizens alone and let us ride our bikes! For crying out loud folks keep it simple here.
