Comments: Thank you so much for considering emtb to have access to trails. Please approve trail access for class 1 ebikes as they are limited to a max assist of 15-20mph and provide very moderate assistance. This year I purchased my very first ebike and it has been life changing. I've spent more time in nature than I ever have in my entire life. It helped me overcome my depression and anxiety. I never would have been able to experience this on a normal bike because of my fitness level and injuries. I plan on continuing to train and get stronger so maybe one day I will be able to ride without an ebike, but I never would have seen training as worth it until now. Please allow ebikes on trails. It makes all the difference for people with injuries, seniors, and people who are interested in an amazing sport.
