First name: Scot

Last name: Armatís

Organization:

Title:

Comments: The Stibnite gold mine effectively gives our public land to a private, for-profit organization to profit off the land owned by citizens. Then, as we learned from Butte, MT their profits will not pay for the damage done decades or even a century later - it will again be picked up by taxpayers. And at what cost? Poisoning our land and our rivers, destroying prime fish habitat. All because some lobbyists in DC are padding the pockets of politicians? NO to this mine! NO to letting Midas draft any part of their own environmental impact statement.
