Comments: I am absolutely opposed to allowing Ebikes into areas where motorized vehicles are currently banned. These bikes can travel faster than non-motorized bikes and are quieter than when a person is pedaling a conventionally powered bike when a person is huffing and puffing. This allows a person on an ebike to spook wildlife at the last possible second. Mountain bikes are already a distraction for hikers who are trying to find a little peace from their daily distractions. We do not need ebikes to add to the distraction of the solitude that people are trying to find. Do not bring distractions of daily life into our parks and wilderness.
