Comments: To USFS governing body,

I would ask that you consider reviewing the designation of ebikes and differentiate using the classification set up to allow only Class 1 type bikes on trails and unimproved roads. Class 1 ebikes offer pedal assist which requires users to provide a portion of the energy needed to propel the bike and rider. Changing the use to motorized would place trails with a similar designation as roads for motorized vehicles. Thank you for the opportunity to respond to this possible change.

Respectively, Joe Short
