Comments: First please change the classification of eMTB's to non-motorized. Second, an eMTB is the only way my wife can get out with me to access OUR USFS lands. I think it's fair to regulate speeds to surrounding bikes when within visual or audible sight and no greater than what people can ride on a regular bike. Make a mandatory class with the money going to support trails to teach bikers how to co-exist considering how much hate there is for eMTB's by MTB'ers. It's awful what disabled people have to be subjected too by these entitled individuals. Please help.
