Comments: Contrary to what I shared on the People for Bikes website, I do not support e-bikes on trails. The problem is that they go faster than average bicyclists. You can very non experienced e-bike riders going faster than experienced bicyclists. That's not good or safe! Their speed will also tend to tear up trails.

The People for Bikes post ask for options! I filled it out without realizing that it was for the support of e-bike on trails. I do not support that. They need to be on the road.
