First name: Matthew

Last name: Strange

Organization: Parkwood East Home Owners Association

Title: Board of Directors

Comments: eBikes are power assisted, not motorized. They should not be classified as motorized. Human input is still required for there continuous use, thus making them none motorized, relying completely on fossil fuels, or electricity for 100% of there power output.

Even when powered solely on electricity, human input is still required to recharge the battery, and human input is still required for there continuous usage, unlike a purely motorized piece of equipment such as a motor cycle that relays on fossil fuels for 100% of its power.

eBikes ultimately rely on human input and power for continuous power, thus making them not fall into the motorized category.
