Comments: Hello,

I am strongly against FSM 7700 and 7710 E-bikes #ORMS-2619. Once eMTBs are allowed, the official trail designation changes from non-motorized to motorized and this is not something I can support! In fact, it terrifies me. Most of us are hooked up to devices and screens all day long. The trails are a place to UN-PLUG - be close to nature, and appreciate that we live in the most beautiful place on earth (my opinion!) Already, eMTBS careen down trails where they're not allowed, ignoring rules and right-of-way; there have been a few times I've nearly been knocked over by an eMTB passing me on a steep hill climb. eMTB's have their place, but PLEASE preserve our quiet trails where travel using our good old human or equestrian power, not engines or batteries! I beg USFS to adopt a policy that is forward-looking, practical, allows for local flexibility, and does not jeopardize our existing non-motorized recreation organization partnerships.

Thank you,  
Karlye Mickley
