Comments: Ebike are a great method to assist people getting into the out of doors. They allow those who need some assistance enjoy our lands in a way they have been unable too previously. Comparing an ebike to a motorcycle is wholly irresponsible. They do not belong to the same group. A class 1 or 3 ebike requires the rider to propel the bike and the motor only assists. They are much more closely related to a mountain bike than they are to a ATV or a dirt bike for that matter. Please do not classify ebike a as motor vehicles. They do not tear up the land as a motor vehicle does, they do not go as fast, or make as much noise. Even though these can go up to 28 mph, that is a rare thing, and usually involves a downhill stretch. They are faster on climbs, but not by enough to remove them from the bike class and put them into the same class as a dirt bike. Please do not classify class 1 and 3 ebikes as motor vehicles, they really are not the same.
