Comments: Ebikes allow access to the forest for people that do not currently have a means of accessing it. Those people do however still have the right, and desire to access it should a means arise. Ebikes are that means! I am talking about people such as those with injuries, disabilities or advanced age who have not utilized their RIGHT to access of the forests but can now use ebikes to enjoy it. Please do not cut these people off from enjoying the forest the way able bodied people can enjoy it.
