Comments: Hi, to whom it may concern, good day to you, I would just like to make clear that emtb or motorized bicycles may not be classified as a motorized vehicle because each has it's own distinct characteristics that differentiate them from each other. A emtb will only leave as much footprint to the federal lands like non motorized bicycles because emtb's does not leave any form of pollution nor does it leave any form of waste just because a bicycle is motorized. What it does is it gives people with limited mobility access to places and recreation that they may not usually afford with a non motorized bicycle. The land belongs to EVERYONE regardless of how respectfully they use it for recreation, adventure or exercise.
