Title:

Comments: As a frequent hiker and biker on these trails, I urge you to keep trails closed to all motorized traffic, including e-bikes. Where rails-to-trails, or gravel roads are available, ebikes should be allowed, but trails that are currently un-motorized should remain so.

I'm concerned about trail maintenance, hiker and biker safety, and the public perception of trail use.

I stand opposed to ebike use on publicly managed trail systems for which they are not currently designated for motorized use.
