Comments: Please allow the use of E-bikes on regular bicycle trails and non motorized vehicle roads and trails. I've been bicycling my entire life and now that I'm getting older, the E-bike is the incredible smart choice to continue to do what I love while still getting lots of exercise, and also including my wife and grandkids. These bikes are extremely quiet and clean, they don't tear up the trails or land in any way. To be able to take my electric bike up in the woods, away from the city and busy neighborhoods, to just get out into nature is absolutely the best medicine for a tired or stressed out person in need of a little bit of peace and enjoyment. I can tell you sincerely with all my heart how much I will appreciate your vote to allow these amazingly wonderful electric powered bicycles to be allowed to go wherever we wish, out in the woods of our beautiful country, to enjoy a quiet long ride up to a mountain lake, to go fishing or to just take a ride out into nature and enjoy each other's company. Until you try one of these bikes, and see what you've been missing, I'm sure that you will agree with me, if we can ride quietly anywhere in our country, the fun possibilities are endless!!!

Thank you so much for listening and taking my wishes into consideration.

We all appreciate everything you do to protect our beautiful outdoors!

Kelly Mackie
