Comments: At the risk of stating the obvious, E-bikes have a motor and therefore should be designated as motor vehicles. I understand and appreciate this categorization. As an avid biker I feel that E-Bikes add additional hazards to myself and all trail users as it allows unexperienced riders to travel at unsafe speeds on trails designed to accommodate a variety of users.

Please restrict E-bikes (and anything else with a motor for that matter) to trails and roads which allow motorized trails. There is no reason any motorized vehicle should be given access to trails that have been off limits to them because of some current trend. Cars have been hip for a while now and i absolutely dont want them on our trails either.

Thank you for the option to comment on this decision!
