Comments: The people that started the mountain biking trend are now becoming senior citizens. The love for mountain biking is still strong, but my legs can't carry me as they should. I still enjoy time on the trails with the bike shop group rides. As we have learned during this pandemic, isolation SUCKS! I am a 200 watt motor away from rejoining my group. 200 watts will not harm the ground!!!! This is pedal assist, not a motorcycle. I rode an e-bike in Switzerland last year. The whole group has them.....ebikes are the future. Get on board and allow them on the trails.
