Comments: I do not feel allowing e bikes on mountain bike trails is better for mtb advocacy. its hard enough to get trails built, now you want to allow electric assist bikes on trails. electric assist bikes are great for paved paths, getting too and from work but not on single track. here in ashland oregon our trails are being decimated by electric pedal assist bikes. In the last six months we have noticed wider burms, new high lines where none existed. Allowing e bikes on trails is a slippery slope, whats next, throttle assist, 125 horse power small motor cycles, 50 hp scooters?

please keep E bikes to the city.
