Comments: I am approaching my 70th year on this earth and count our U.S. public lands as our greatest asset. I have purchased my first Ebike for the sole purpose of riding off road. I purchased a class 1 as it most resembles a true bicycle experience.

The USFS should allow class 1 E bikes on all trails currently open to leg powered bicycles as they allow those of us with less mobility and strength to enjoy our public land to the fullest. The USFS should look at allowing class 1 bikes on all trails with the same view as the ADA.

Thank you
