Comments: E bikes as they are today may seem harmless but I'm afraid they will go the way of other off road vehicles in a race to make faster and more powerful models each year. If the bike has a motor it should be ridden on trails with other motor bikes. ATVs and UTVs have gotten dangerously fast for the user and other trail users as well. Mountain bikes here in Missouri ride on shared trails with hikers and horses e bike would be hazardous to both. The jet ski industry did the same thing as ATVs when they first came out I could safely let my preteen kids ride them but soon they got to powerful and are now required to have a licence as they go 80 mph. Also mountain biking was a green sport but could soon be turned into a power hungry motor sport.
