Comments: Midas Gold is not welcome in Idaho and it is not welcome to ruin a pristine and beautiful river. The Southfork Salmon River is one of the last few rivers that allow Salmon to continue their life cycle. What makes Idaho so special is the pristine, uninterrupted and disinfected lands from greedy businesses. The Southfork Salmon River is such a special place and is what makes Idaho, Idaho. Please do not mine on or near this river and allow it to continue to flow the way that nature created it.
