Comments: I do not support the inclusion of Ebikes (class one motors) on non-motorized trails. Please do not allow the industry to sway you into changing this rule. We rely on our Non motorized trails For running, skiing and biking all human powered and at the same speed roughly. Adding motors changes all that and also makes our traditional funding in question. Please say no to this change.

Thank you for representing my comment And for your management of our wonderful public lands. and for your careful management of our wonderful public lands.
