Comments: Hi, thanks for allowing me to comment on e-bikes.

E-bikes are coming, there is no stopping them, but there is a place for their proper use.

Class 1 e-bikes require pedaling and their speed is governed and should be allowed on certain trails when okay on a local basis. We have trails in the North Cascades that can have hundreds of hikers on them, e-bikes have no place in a situation like that.

Class 2 and Class 3 are nothing more than an electric motorcycle. They have no right or place to be on a non-motorized trail. That way our court system works, once you allow electric motorcycles on a trail, regular motorcycles will still follow.
