Comments: eBikes should not be allowed on non-motorized bicycle trails. It is not safe for those on non-motorized bicycles. I bike in NYC on the bike lanes on a very regular basis. I ride at a fairly high speed on a road bicycle. I am constantly getting passed by eBikes at a speed double to mine. They are quiet and you do not know they are coming up on your not passing. I have been in several near misses and I have a friend that was seriously injured. They should not be on a bicycle trail.
