Comments: Hi,

I am a frequent MTB rider and occasional OHM trail user from MN, IA through CO, UT.

I strongly feel the lower two classes of eMTBs should be allowed on all MTB trails, more rider access will ultimately lead a larger trail system with more funding available.

I do not have an eMTB. I have not experienced FSM trails where I felt crowding was an issue, I have rode areas where I wished there were more trails and more user amenities.

To have effective rules, less is always more.
