Title:

Comments: Dear DOI and Forest Service. I love our public lands and always have. I had heart surgery in 2010. It worked but the only way I can ride a bike in our Federal lands is the use of a Class 1 MTB. I respect others and don't ride any faster on flats and down hills than is designated safe and respectful.

Up hill is impossible for me without an e-MTB. Class 1 is plenty. It's is a joy to have access to trails not just roads. For those of us who are older or with medical issues or both we need e - bike access.

Thank you. Noel Douglas Martin
