Comments:

In regards to lifting E-Bikes into the back country and wilderness. This issue with motor bikes progressed to 4 wheelers, and now side by side. They are pushing the game into even more remote areas, and changing their Natural feeding and migrational habits. Also the destruction of the trails, is causing deep erosions. I have had many experiences of being in the back country, with motorized vehicle restrictions, only see them broken, with no one enforcing the Rules. I have been traveling in the back country and wilderness for 50 years in all of the Western States, the decline in trails, and game has declined to very low numbers. We need to start enforcing the Rules already in place instead of more encroachment. I am completely in Opposition to this E-bike proposal.
