Comments: Hello- I recently learned about this and would like to voice my concerns of classifying a pedal assisted bike as a motorized. I would like to note, I do not own an e-bike but do own a motorcycle.

-First concern is this ruling does not align with the recent BLM/interior ruling which will only cause more confusion and issues with the general public. Leading to conflicts and essentially when people don't know the rules they are not followed.

-I am concerned a pedal assisted e-bike is classified as a motorized. A motorcycle and an e-bike are vastly different things. If you have ever ridden the two the difference is incomparable. E-bikes should be regulated as non-motorized. You still have to pedal an e-bike.

-Lastly, by pushing more bikes to "motorized" trails it becomes dangerous and the safety concerns of a motorcycle colliding with an e-bike is real. Motorcycles are loud and can be heard while an e-bike is silent.

Thank you,

Ross Cichosz
