Title:

Comments: The policy should include an exception for e-mountain bikes to be treated the same as mountain bikes. I have a spinal cord injury and am only able to ride an e-bike so allowing e-bikes is essential to those of us with disabilities or people who are just getting older. E-mountain bikes are not like motorcycles at all. They are just like regular mountain bikes with a bit of assist on the pedals. They do not cause the same kind of damage as motorcycles and should be treated as non-motorized.
