Comments: ALLOW CLASS-1 E-BIKES TO USE TRAILS CURRENTLY DESIGNATED AS NON-MOTORIZED.

Currently, non-motorized trails are appropriately marked to disallow powerful gas-powered vehicles for good reasons - noise, damage, hiker-risk, smoke. But technology has changed.

Class-I e-bikes do not have the trail-use issues caused by traditional motorcycles, quads, etc.

I am a hiker and mountain biker, and have had no issues with pedal-assist low-powered e-bikes.
