Title:

Comments: I am perfectly OK with E-bikes having the same access as peddle bikes to public lands managed by the USFS. The only issue with ebikes is the additional weight, and at 5'8" 155lbs there are plenty of riders on peddle bikes that weight a lot more than I do. I'm 67 and ride mostly every other day on my Mtb weather permitting. I usually ride at 2 public owned locations one that Evergreen is affiliated with and one a state park. I have encountered E-Mtb's numerous times and they all abide by the stated rules and are always courteous and friendly.
