Comments: I do not own an E bike and have only been riding Mountain bikes for 6 months now. My wife and I have been hiking MO trails for over 20 years. It was good cheap entertainment when our kids were young and some good bonding times after our kids went to college. I have never had a problem with sharing the trails with Mountain bikes. Now that I'm in my 50s and starting a new hobby I can see the purpose for an E bike and think they should definitely be allowed on the trails.

Thank You

John
