Comments: In my humble opinion, e-bikes, no matter the class, are motorized transportation and I believe that non-motorized trails should be kept non-motorized. I ride my regular mountain bike on lots of trails that allow motorized use and from my experience there is an amazing amount of great trails for e-bike use in the state of Montana. E-bike owners just need to do their research.

Trail use between hikers, equestrians, and mountain bikers has been controversial enough without adding another layer of users to the mix. The use of regular mountain bikes on trails has been a hard fought battle and I would not want to see it jeopardized by these power assisted devices just so someone can go up the hill a little easier.

Thanks
