Comments: Most people who are against e-bikes do not understand what they are or why riders may want to use an e-bike rather than a traditional mountain bike. Being in my low eighties age-wise I find that my class 1 bike allows me to ride with younger riders and keep up with them (I used to be one of them). I can also ride much further without tiring and explore areas that I used to be able to do but find it now difficult without some motor assist. Please move forward and consider allowing class 1 bikes in areas that now only allow non-motorized vehicles.
