Comments: Hello,

I have been a mountain biker for almost 40 years now. Ebikes have allowed me to still get to the places I love to go, even as my physical abilities are declining with age. I am a board member on a local trail foundation and there are no issues on our local trails (NF) with ebikes added into the multi-use mix of our users. I believe that there is no more trail impact then with the latest downhill bikes and weigh about the same. Allowing class 1 ebikes on non-motorized FS trails would allow a lot more people to get out and use the trails.

Thanks,

Chris
